

PRESS RELEASE

Tulip By Germain

A breakthrough in the luxury world
The ultimate champagne and fine wines cooler tray
Technically designed for the most prestigious
yachts and private jets

 YouTube

Where Art and Luxury Meet

- Each cooler tray is equipped with a revolutionary and patented high-tech mechanism designed to withstand up to 30° tilt angle.
- The eight glass holders are able to welcome any possible type of champagne flute or wine glass.

Endless Customization

- Starting from a range of luxury finishing touches such as carbon fiber, as well as white, yellow or pink gold
- Play with colors to match those of your private yacht or jet
- Engrave any part of the cooler tray at your leisure
- Add up from a range of rare materials such as diamonds, sapphires, emeralds, rubies, pearls, or even coral, mother-of-pearl or tortoise shell
- Jewelry can be supplied from the best French jewellers.
- Crystal manufacture from the most prestigious crystal houses.

Concept Genesis

Born and raised on the French Riviera, Germain Mari-Olive has a past experience of over 20 years as Captain of luxury yachts. He then accumulated a thorough knowledge and understanding of owner's wishes and expectations. The concept of this revolutionary champagne cooler tray came as a result, and participates to a culture of utmost luxury that truly makes a difference. Germain and his team spent 4 years developing the perfect alliance of cutting-edge technology and ultimate luxury. This remarkable achievement, based upon traditional technics, required over 800 hours of expert manufacturing by the finest craftsmen. It is fully protected by international patents.
