

Tulip By Germain, a timeless piece of art

The French brand Tulip By Germain presents a luxury tray to host your best Champagnes and ultimate wines. This unique and futuristic cooler tray uses a hi-tech mechanism gyroscopic instrument.

The gyroscope technology helps maintaining the bottle and the glasses in vertical position, up to a 30° tilt on all three axes.

The eight glass holders are designed to welcome any possible type of Champagne flute or wine glass. Harmoniously combining art and technology, Tulip By Germain brightens each and every party aboard your yacht, and livens up in an exclusive way the trips on board your private jet.

That piece of art has been created thanks to the French savoir-faire of selected craftsmen. 800 hours of manufacturing based upon traditional expertise and technics are needed to complete each Tulip By Germain item. A breakthrough in the luxury world.

Tulip By Germain can be customized in many ways to fit your own wishes and requirements. A full range of exclusive models is available. You can choose from a range of luxury finishing touches such as carbon fiber, as well as white, yellow or pink gold. Ice buckets and wine glasses can be selected from the collections of prestigious crystal houses: Baccarat, Lalique, Daum...

Add up from a range of rare materials such as diamonds, sapphires, emeralds, rubies and pearls, or even add a touch of nature with organic materials such as coral, mother-of-pearl or tortoise shell. Jewelry can be supplied from Cartier, Bulgari, Van Cleef & Arpels...
